SUMMARY

Detail-oriented data professional with 4+ years of experience across data analytics, data engineering, and data science in enterprise and research environments. Strong expertise in SQL analytics, ETL development, machine learning, and dashboarding, with hands-on experience processing large-scale datasets and delivering stakeholder-ready insights. Proficient in Python, SQL, cloud platforms, and BI tools, with a solid foundation in statistical analysis, predictive modeling, and automation.

SKILLS

Languages: Python (pandas, NumPy, matplotlib, seaborn, Plotly), SQL (MySQL, SQL Server), R, SAS, SPSS

Data Engineering & ETL: ETL/ELT pipelines, data cleaning and validation, data transformation, data modeling (star and snowflake schemas), Snowflake, AWS Glue, workflow automation

Data Visualization & Reporting: Power BI (DAX, data modeling), Tableau, Plotly Dash, Looker Studio, Excel

Analytics & Statistics: Exploratory Data Analysis (EDA), hypothesis testing, regression analysis, time series analysis and forecasting, predictive analytics, anomaly detection, cohort and retention analysis

Machine Learning: Supervised and unsupervised learning, feature engineering, model evaluation and validation, Scikit-learn, time series forecasting

Natural Language Processing (NLP): Text classification, topic modeling (LDA), sentiment analysis, semantic similarity

Deep Learning & LLMs: PyTorch, TensorFlow, Hugging Face Transformers, BERT, GPT, LLM-based pipelines, generative AI

Cloud & Data Platforms: AWS (Athena, QuickSight, SageMaker, Lambda), Google BigQuery, Jetstream2 HPC

WORK EXPERIENCE

Data Management Analyst II, Institutional Planning and Research – University of Florida

Apr 2026 – Present

- Design, update, and maintain Tableau dashboards and visualizations supporting admissions, enrollment, graduation & retention, and other institutional reporting needs.
- Support IPEDS and Board of Governors reporting by validating federal and state data files, performing data integrity checks, and ensuring compliance with reporting standards.
- Use statistical software (SAS, SPSS) and database technologies (MS SQL Server, Snowflake) to analyze and interpret institutional data, including enrollment, financial, and human resources data, for university planning and decision-making.
- Design and maintain institutional data resources, including operational datasets, dashboards, crosswalks, program inventories, and source data for reporting and web-based applications.
- Produce reports, visualizations, and analytical summaries for university leadership while collaborating on reporting systems, self-service data resources, and modernization of enterprise databases and productivity tools.

Research Associate (Data Scientist), Indiana University Bloomington

Jan 2025 – May 2026

- Conducted interdisciplinary research at the Data Science and AI Lab (DSAIL), Kelley School of Business, in collaboration with the School of Public Health, analyzing behavioral, sensor, and survey data from 800+ participants using Python, SQL, and statistical methods to identify early indicators of depression and anxiety.
- Processed and modeled 10M+ multi-modal records (motion, location, Bluetooth, battery, health metrics) using reproducible pipelines on Jetstream2 HPC, improving data quality and reducing processing time by 40%.
- Developed statistical and ML-based approaches including correlation analysis, anomaly detection, forecasting, and behavioral trend modeling.
- Built 5+ interactive dashboards (Plotly Dash, Tableau) visualizing retention trends, symptom progression, user-level behavior, and demographic comparisons.
- Delivered insights on engagement patterns, wellbeing trends, and data quality gaps to research leadership and clinicians, supporting study monitoring and decision-making.

Product Intern — AI-Enhanced Underwriting, NeuralMetrics, Colorado

Sep 2025 – Dec 2025

- Improved the GIA Lite AI underwriting assistant by optimizing LLM context and reducing token usage, preserving output accuracy.
- Designed and implemented summary and context-pruning routines to streamline LLM inputs and enhance model responsiveness.
- Supported evaluation and improvements of LLM-powered risk classification workflows used in commercial insurance underwriting.

Data Analyst, Wipro Limited, India**Dec 2021 – Aug 2023**

- Assessed 2M+ digital transactions using SQL and AWS Athena to identify system bottlenecks, recurring issues, and usage anomalies, improving reliability of reporting.
- Designed 10+ Power BI dashboards to monitor key performance indicators (KPIs), reducing ad hoc reporting requests by 35%.
- Automated rule-based anomaly detection scripts in Python/SQL to automatically flag abnormal spikes in failures or latency, reducing unresolved issues by 30% and improving resolution times by 50%.
- Collaborated with cross-functional teams to define performance metrics, ensuring consistency in reporting across stakeholders.
- Streamlined 4+ recurring reporting workflows in Python, cutting manual reporting time by 40% and improving output accuracy.

Data Analyst Intern, Societe Generale, India**Aug 2021 – Dec 2021**

- Audited 10K+ transactional records using MS SQL Server to track SLA adherence and operational KPIs.
- Built Tableau dashboards that cut manual reporting time by 40% and improved visibility across 3+ departments.

EDUCATION**Master of Science in Data Science**, Indiana University Bloomington**Aug 2023 - May 2025**

Coursework: Data Visualization, Advanced Database Concepts, Applied ML, Data Mining, Cloud Computing-AWS, Statistics

CERTIFICATIONS

Microsoft Certified: Power BI Data Analyst Associate (PL-300), AWS Certified Cloud Practitioner
